174 000 € ALL TAX INCLUDED

Description

Jeanneau Cap Camarat 10.50 WA 2020 – Twin Mercury Verado 350 HP – Generator – Full Options – Survey 2024. Stunning Jeanneau Cap Camarat 10.50 WA built in 2020, one of the most sought-after walkaround models in her category, combining sporty performance, offshore capability and true cruising comfort. Powered by twin Mercury Verado 350 HP V6 outboard engines delivering a total of 700 horsepower, this unit offers exceptional acceleration, impressive top-end performance and smooth, controlled navigation. With 250 engine hours, she presents a balanced usage profile and remains in very good overall condition. Her deep-V hull ensures outstanding sea-keeping abilities, remarkable stability at speed and confident handling even in rougher conditions. Whether for fast coastal cruising, family outings or longer Mediterranean adventures, this Cap Camarat 10.50 WA delivers both performance and comfort in equal measure. A major highlight of this boat — and a rare feature in this segment — is the onboard generator. The boat is equipped with a generator that allows the use of 230V even at anchor: making coffee, cooking, using outlets or electrical appliances just like at home. The generator has only been used for 3 hours, so it's practically new. This is an extremely rare feature on Cap Camarat 10.50 WA boats and highly sought after for increased autonomy while at anchor. This feature significantly enhances the boat's value and distinguishes her from many comparable units on the market. Navigation and maneuvering equipment include Garmin GPS, Garmin 215 AIS VHF, AIS system, automatic Zipwake trim tabs for optimal running attitude, Quick bow thruster for effortless harbor maneuvers, and a Lewmar 1000W electric windlass with 40 meters of chain. The helm station is ergonomically designed, providing excellent visibility and intuitive control. Externally, the boat features a rigid hard top for protection and style,
