Description

DUFOUR 41 CLASSIC "GARFIELD" — 1996 — CONTINUOUS MAINTENANCE HISTORY CAP MED BOAT & YACHT CONSULTING presents this 1996 Dufour 41 Classic, named "GARFIELD". At 11.89 metres with a 3.97-metre beam and a 1.89-metre draft, this Dufour Yachts cruiser offers one of the best volume-to-accommodation ratios of her generation: three cabins, eight berths and two shower rooms with heads — a rare configuration at this size. What sets this yacht apart is the continuity of her maintenance. Structural items have been addressed over the years: standing rigging and furler replaced in 2015; upholstery, hull linings, cabin carpets, Jabsco heads, pumps, piping and taps renewed in 2017; three deck hatches replaced in 2018. Part of the interior varnish has also been redone. She was upgraded again recently: service battery bank and engine battery renewed in July 2026, anchor chain replaced at the same time, handheld VHF replaced with a new Icom IC-M37E, and a stainless gas barbecue fitted. Power is a Yanmar 3JH2-TCE on an SD31 saildrive with a three-blade propeller, showing approximately 2,800 hours at the last inventory. Mechanical follow-up is documented and regular: oil changes, filters, impeller, belt, cooling hoses and exhaust elbow replaced, with a new water pump in 2026. The sail wardrobe is particularly complete for voyaging: furling genoa, semi-battened mainsail in good condition, gennaker with furler, symmetrical spinnaker, staysail on a removable inner forestay, storm jib, spinnaker pole and bowsprit, all with a lazy bag. Two spare sails, genoa and mainsail, come with the boat — at the end of their life but useful as backup. Autonomy has been improved: two 180 W solar panels (360 W total) with a Victron SmartSolar MPPT 30 A controller, a bank of four 110 Ah service batteries and an independent engine battery. Below decks, a two-burner gas cooker, a fridge with cooling unit, a pressurised water system and 410 litres
