Description

This 2021 Cap Camarat 10.5 WA is the flagship of Jeanneau's walkaround range, in a particularly well-executed configuration. At 10.57 metres overall and 3.21 metres in beam, she offers the volume and stability of a boat of this size while retaining the versatility that made the series successful, equally at home on day trips and extended coastal cruising. Power comes from twin 2021 Suzuki 350 hp outboards, 700 hp in total, with 270 hours. That output gives the boat a lively character, backed by a deep-V hull that absorbs chop and holds a clean attitude in rougher conditions. The deck plan is the model's main asset. Full walkaround circulation allows safe access to the foredeck from the cockpit without stepping over anything. The aft cockpit is arranged around a convertible table on teak flooring, with a bench converting into a sunbed and an aft unit fitted with a sink. The foredeck has a second sunbed, topped by a solar panel integrated into the hatch. The helm station is sheltered by a hard top with a wraparound windscreen. It carries a large multifunction display, autopilot, VHF, depth sounder, speed log, wind instruments, compass and navigation system. Helm and co-pilot seats have flip-up bolsters, facing a fully integrated console. The cabin below deck has a sleeping area, a heads compartment with marine toilet and shower, and hot water. The boat also features a bow thruster, shore power inlet, battery charger, raw water pump, cockpit shower, gangway, bathing ladder and cockpit cushions. A flat screen television and cockpit speakers complete the equipment. A tender with its electric motor, brand new and never used, comes with the boat, along with a dedicated fishing power socket and a fitted galley. The boat can be viewed at Villeneuve-Loubet, in the Alpes-Maritimes. VAT paid. We are at your disposal to arrange a visit or a sea trial.
